Experience as our foundation

Dear Shareholders,

It gives me immense pleasure to present the Annual Report of Borana Weaves Limited.

Having spent more than five decades in the textile industry, I have witnessed its remarkable evolution - from conventional manufacturing practices to modern, technology-driven and globally competitive operations. Today, India's textile and apparel industry is a vital pillar of the national economy, contributing approximately 2% to the country's GDP, 9% to merchandise exports and providing employment to more than 45 million people. During FY 2024-25, India's textile exports stood at approximately USD 37.7 billion, representing a 4.1% share of the global textile and apparel market.

The global textile industry is entering an important phase of transformation. Rising disposable incomes, rapid urbanisation and increasing demand for performance apparel, home textiles and technical textiles are expected to drive sustained growth. At the same time, consumer preferences are steadily shifting towards man-made fibres. This changing landscape presents a significant opportunity for India and for Borana Weaves.

At Borana Weaves, we have built our business with a clear focus on quality, efficiency and disciplined growth. Our integrated capabilities across polyester texturising, warping and weaving provide better control over product quality, production timelines and operating costs. By continuously modernising our facilities, installing high-speed water-jet looms and adopting advanced manufacturing technologies, we are strengthening our ability to serve evolving customer requirements.

Our growth strategy is not based merely on increasing capacity. It is centred on greater productivity, operational excellence and responsible use of resources. We remain committed to improving manufacturing efficiency, reducing waste and strengthening renewable energy use, enabling a more sustainable and future-ready organisation.

India has set an ambitious target of achieving USD 100 billion in textile exports by FY 2030. While the country has traditionally enjoyed a strong position in cotton, the next phase of growth will require greater competitiveness in man-made fibre-based textiles. With our established polyester fabric platform, modern infrastructure and focus on technology, Borana Weaves is well positioned to participate meaningfully in this opportunity.

I sincerely thank our shareholders, customers, employees, business partners, bankers, government authorities and all other stakeholders for their continued trust and support. Our employees remain the foundation of our progress, and I deeply appreciate their dedication and hard work.

With experience as our foundation, technology as our enabler and responsible growth as our guiding principle, I am confident that Borana Weaves will continue to contribute to India's emergence as a future-ready global textile manufacturing hub.

Warm regards,

Mangilal Ambalal Borana | Chairman & Managing Director

Experience, technology and responsible growth will guide our next phase.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

DISCLAIMER

Statements in the Directors' Report & Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations or predictions may be "forward looking statements" within the meaning of applicable securities laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make difference to the Company's operations include raw material availability and its prices, cyclical demand and pricing in the Company's principal markets, changes in government regulations, tax regimes, economic developments within India and the countries in which the Company conducts business and other ancillary factors.

1. INDUSTRY STRUCTURE AND DEVELOPMENTS:

Global Textile Industry Structure

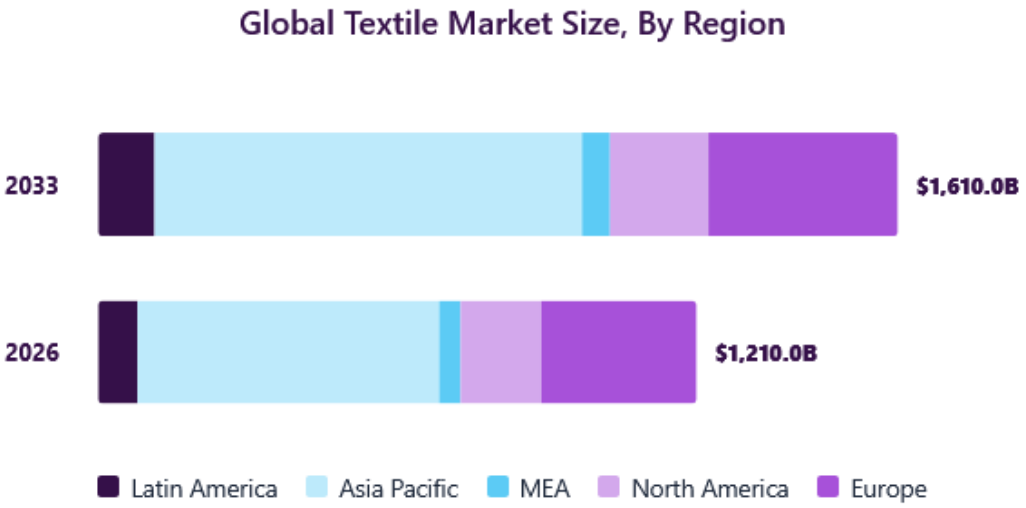

The global textile market size is valued at USD 1,210 billion in 2026 and is forecasted to reach at USD 1,610 billion by 2033, at a CAGR of 4.2% from 2026 to 2033. Asia Pacific dominated the global market, accounting for the largest revenue share of 49.9% in 2025. The demand for textiles is rising due to fast fashion, growing urbanization, and increasing disposable incomes in emerging economies.

Market Dynamics

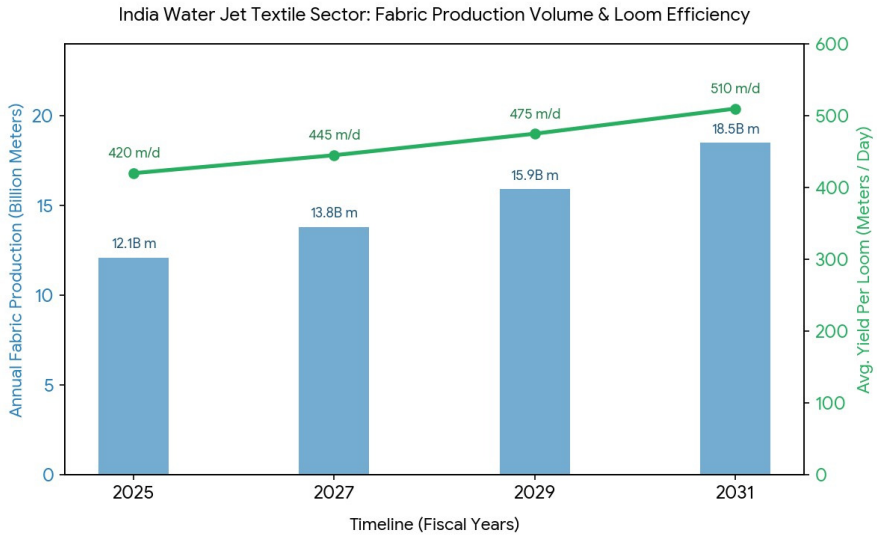

The global weaving industry is a vital segment of the textile value chain, responsible for converting yarn into woven fabrics used in apparel, home textiles, technical textiles, automotive interiors, and industrial applications. It bridges upstream fiber spinning and downstream garment manufacturing. The industry is characterized by a diverse production base, varying levels of technological advancement, and increasing emphasis on sustainability and innovation.

The market is heavily concentrated in the Asia-Pacific region, characterized by a mix of high-tech automated mills and decentralized, small-scale local operations.

Indian Weaving Industry Structure

India is one of the major textile production bases in the world in weaving sector. The total fabric production from water jet looms in India is projected to grow from 12.1 billion meters in 2025 to over 18.5 billion meters by 2031. The weaving and overall textile industry in India has a bright outlook. The market is Driven by massive domestic demand, government support like PM MITRA Parks, China Plus One, and a shift in global buyers looking for stable supply chains, India accounts for major global loom capacity.

2. OPPORTUNITIES AND THREATS:

a) Opportunities:

1. Rising Global Demand for Textiles

Growing population, urbanization, and increasing disposable incomes are driving demand for apparel, home textiles, and technical textiles, creating significant growth opportunities for the weaving industry.

2. Government Support in India
Government initiatives such as the PM MITRA Parks Scheme, Production Linked Incentive (PLI) Scheme for Textiles, China Plus One and export promotion measures are encouraging modernization, investment, and capacity expansion.

3. Growing Export Opportunities
India is strengthening its position as a reliable sourcing destination as global brands diversify their supply chains beyond China. Free Trade Agreements (FTAs) with several countries are expected to enhance market access and boost exports.

4. Adoption of Advanced Technology
Investment in Water Jet Machines, automation of manufacturing activities and use advanced technologies is improving productivity, fabric quality and resulting in cost efficiency.

5. Increasing Demand for Sustainable Textiles
Consumers and global brands are increasingly demanding eco-friendly products made from organic cotton, recycled fibers, and sustainably produced fabrics, creating opportunities for manufacturers investing in green production.

6. Growth of E-commerce and Fast Fashion
The rapid expansion of online retail platforms and changing fashion trends are increasing demand for diversified woven fabrics and shorter production cycles.

7. Value Addition and Product Diversification
Manufacturers can improve profitability by producing high-value fabrics, designer textiles, functional fabrics, and technical textiles, rather than relying solely on conventional woven fabrics.

b) Threats:

1. Volatility in Raw Material Prices
Frequent fluctuations in the prices of cotton, polyester, and other fibers significantly affect production costs and profit margins.

2. Intense Global Competition
Competition from low-cost textile-producing countries such as China, Bangladesh, Vietnam, Pakistan, and Turkey places pressure on pricing and market share.

3. Rising Energy and Logistics Costs
Increasing electricity tariffs, fuel prices, freight charges, and transportation costs reduce operational efficiency and profitability.

4. Supply Chain Disruptions
Global geopolitical tensions, pandemics, shipping delays, and trade restrictions can interrupt the supply of raw materials and delay product deliveries.

5. Stringent Environmental Regulations
Compliance with stricter environmental standards related to water usage, wastewater treatment, carbon emissions, and chemical management requires substantial investments.

6. Labour Shortages and Rising Wages
The weaving industry faces challenges in attracting and retaining skilled workers, while rising labor costs affect competitiveness.

7. Currency Exchange Rate Fluctuations
Changes in exchange rates impact export earnings and increase the cost of imported machinery and raw

materials.

8. Rapidly Changing Consumer Preferences
Fast-changing fashion trends and increasing demand for customized products require manufacturers to remain flexible and continuously innovate.

9. Fragmented Industry Structure
The Indian weaving industry consists largely of small and medium enterprises (SMEs), which often face challenges in accessing advanced technology, finance, and export markets.

10. Technological Obsolescence
Companies that do not modernize their machinery and production processes risk lower productivity, inferior product quality, and reduced competitiveness in global markets.

3. SEGMENT WISE OR PRODUCT-WISE PERFORMANCE:

The revenue performance is as under:

(Amount in Lakhs)

F.Y.	Grey Sale	Yarn Sale	Down Grade Sale	Beam Sale	Wastage Sale
2024-25	25158.04	3355.35	13.97	424.14	79.53
2025-26	35341.49	1773.08	41.98	1586.60	116.15

4. OUTLOOK:

India's textile industry, a cornerstone of the nation's economic fabric and it is experiencing remarkable growth. India's textile industry is projected to reach $350 billion by 2030, driven by a 10% compound annual growth rate. Export figures paint an equally promising picture. In FY26, the total exports of textiles and apparel (including handicrafts) stood at US$ 35.52 billion, with Ready-Made Garments (US$ 15.77 billion), Cotton Textiles (US$ 10.25 billion), and Man-Made Textiles (US$ 5.23 billion) as the key contributors.

The industry's robust performance is particularly noteworthy in its role as an employment generator. With projections suggesting the creation of 3.5 crore jobs by 2030, the textile sector continues to be one of the largest employers in India's manufacturing landscape.

The government's proactive stance has played a crucial role in this success story. The Production Linked Incentive (PLI) scheme has emerged as a game-changer, attracting substantial foreign direct investment and enhancing production capabilities. The PM MITRA scheme, focusing on integrated textile parks, is addressing infrastructure gaps and streamlining operations.

The Union Budget 2026–27 places the textile sector at the heart of India’s growth, underlining its strategic importance to the economy. By prioritising this labour-intensive industry, the Budget acknowledges textiles as a key driver of job creation, export growth, rural livelihoods and sustainable manufacturing.

The industry's growth is also being driven by evolving global market dynamics. Western markets' increasing demand for sustainable and ethically produced textiles has created new opportunities for Indian manufacturers.

Growth opportunities: Interestingly, the current political crisis in Bangladesh has opened new avenues for Indian textile manufacturers. Global buyers, seeking stable supply chains, are increasingly turning to India, presenting an opportunity to capture a larger market share.

Sustainability and Innovation: Manufacturers are shifting toward eco-friendly practices to meet both domestic demands and stringent international export standards. The technological landscape is evolving too, with a growing focus on technical textiles driven by demand from automotive and healthcare sectors. This

diversification is creating new revenue streams and fostering innovation within the industry.

Regional Dominance: Gujarat remains the undisputed powerhouse of Indian textile and weaving sector resulting in major production, housing a vast majority of the country's manufacturing capacity.

Key Risks and Challenges: The path forward isn't without challenges. The industry's fragmented nature, with numerous small and medium enterprises, poses scalability challenges. Rising freight rates and complex logistics continue to pressure profit margins.

Borana Weaves Limited is well-positioned to capitalize on the growing opportunities in the textile sector, supported by its modern manufacturing infrastructure, established production capabilities and focus on operational efficiency. The Company intends to strengthen its core business of manufacturing greige fabric, enhance capacity utilisation, improve cost efficiencies and explore opportunities in value-added and man-made fibre-based textile products. With a continued focus on quality, sustainability, technology and efficient resource utilisation, the Company aims to strengthen its competitive position and achieve sustainable long-term growth.

5. RISK AND CONCERNS:

The Company's operations are exposed to various risks including fluctuations in raw material prices, changing consumer preferences, competitive pressures, foreign exchange volatility, regulatory changes, and macroeconomic uncertainties. The management continuously evaluates these risks and implements suitable mitigation strategies through prudent procurement practices, cost optimization initiatives, diversified customer relationships, and efficient inventory management.

The list of the potential risks the industry is exposed to domestically/internationally is given below:

a. **Raw Material Price Risk:** The weaving manufacturing industry is inherently dependent on key raw materials such as yarn, dyes, chemicals and other inputs. Volatility in commodity prices arising from market imbalances, climatic conditions, or geopolitical developments may impact production costs and operating margins.

b. **Global Economic and Market Risk:** Macroeconomic uncertainties, inflationary pressures, geopolitical conflicts, and fluctuations in consumer spending patterns across major economies may influence demand for textile and apparel products, thereby affecting industry growth prospects.

c. **Foreign Exchange Risk:** Fluctuations in foreign currency exchange rates may impact export realizations, import costs, and overall competitiveness in global markets.

d. **Competitive Intensity Risk:** The Indian textile sector competes with both domestic and international manufacturers. Increased competition from low-cost manufacturing countries and changing global sourcing patterns may exert pressure on pricing, market share, and profitability.

e. **Regulatory and Sustainability Compliance Risk:** The increasing focus on environmental stewardship, social responsibility, and governance standards has led to stricter regulatory requirements globally. Compliance with evolving environmental, labour, and sustainability regulations may require continuous investments in technology, systems, and processes.

f. **Supply Chain and Logistics Risk:** The industry relies on efficient procurement and distribution networks. Disruptions arising from geopolitical tensions, transportation constraints, raw material shortages, or global trade disturbances may impact operational continuity and delivery schedules.

g. **Energy and Utility Cost Risk:** Manufacturing operations require significant consumption of power, fuel, water, and other utilities. Any substantial increase in utility costs may affect

operational efficiency and cost competitiveness.

h. **Financial Risk:** It is the uncertainty associated with how firms finance its business like by issue of shares, debentures, taking loans from government / financial institutions etc. Such financial transactions also include risk of default in payment of interest, dividend or repayment of capital due to various internal or external factors like increase in credit days of debtors, inflation, interest rate fluctuations, change in government policies etc. It may lead to loss of liquidity, falling assets value, significant change in cash inflow and outflow etc.

i. **Liquidity Risk:** Liquidity Risk reflects the possibility/position that a party may have insufficient funds to settle an obligation for full value when due because of insufficient capital or difficulty in selling as asset or an investment to generate capital, but will have funds to cover settlement obligations on some unspecified date thereafter. In non-bankruptcy situations, the allowable methods to cover short positions are generally driven by local market conventions. As a result, liquidity could be adversely affected by prohibitions on transactions such as Repos, Reverse Repos, Securities Lending and other allied components.

j. **Global Risk:** Global risk refers to an uncertain event or condition that can cause significant negative impact to several countries or industries for a long period of time. India is still emerging in the market of textile industries. There is a tremendous competition around the world. Indian manufacturers will have to face a tough fight to sustain in the competition. Due to poor infrastructure facilities, the production and transaction cost remain high in India. Also, India's logistic disadvantage due to its geographical location can give it a major thumb-down in global trade. As a result, high cost of shipments and longer lead time coupled with lack of infrastructure facility may prove to be a major hindrance. To overcome this problem, India needs to increase the size of its industrial infrastructure to capture the efficiencies of the economies of scale and it must cluster the textile production.

k. **Political Risk:** Political risk may be defined as the probability that a political event will impact adversely on a firm's profit. It represents the financial risk that a country's government will suddenly change its policies. A new law or a change in an existing could have a significant impact on an investment. Whatever laws the government passes today may be extinct tomorrow. This risk covers restriction on remittances in the buyer's country or any government action which may block or delay payment to the exporter, war, revolution or civil commotion in the buyer's country, cancellation or imposition of new export / import licensing restrictions in the buyer's country, any other kind of loss occurring either in India or outside India which is not within the control of the exporter or the buyer.

l. **Technology and Innovation Risk:** Rapid advancements in manufacturing technologies, automation, and digitalization require continuous modernization and innovation. Failure to adopt emerging technologies may affect productivity, product quality, and competitive positioning.

6. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY:

The Company has established adequate internal control systems commensurate with the size and nature of its business to ensure efficient operations, safeguarding of assets, accuracy of financial reporting, and compliance with applicable laws and regulations. These controls are regularly reviewed through internal audits to ensure their effectiveness and continuous improvement. The management believes that the internal control framework is adequate and operating effectively to support the Company's business objectives and governance standards.

7. FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFOMRMANCE:

During the year 2025-26, the Company recorded total revenue of Rs. 38,859.31 Lakhs against Rs. 29,031.04 Lakhs in the year 2024-25, representing an increase of around 33.85% during the year the Net Profit after

tax of the Company for the year 2025-26 stood at Rs. 6,461.20 Lakhs as compared to Rs. 4,020.23 Lakhs in the year 2024-25 which has increased by around 60.71%.

To conserve resources for the Company's future growth plans, no dividend is being recommended by the Directors for the year ended March 31, 2026.

8. MATERIAL DEVELOPMENTS IN HUMAN RESOURCES:

At Borana Weaves Limited, employees are recognized as the cornerstone of the Company's success and sustainable growth. The Company remains committed to fostering a positive, inclusive, and performance-driven work environment that encourages continuous learning, innovation, and professional development. During the year under review, focused efforts were made towards skill enhancement, employee engagement, leadership development, and workplace safety through various training and development initiatives. The Company continues to promote a culture of collaboration, accountability, and operational excellence while ensuring employee well-being and welfare. Industrial relations remained cordial and harmonious throughout the year, reflecting the Company's commitment to maintaining a motivated and empowered workforce aligned with its long-term business objectives.

FINANCIAL STATEMENTS

Independent Auditor's Report and audited standalone financial statements for the year ended March 31, 2026.

FY 2025-26

INDEPENDENT AUDITOR'S REPORT

To the Members of

Borana Weaves Limited

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of Borana Weaves Limited ("the Company") which comprises the Balance Sheet as at March 31st, 2026, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the financial year ended thereon and notes to the standalone financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statement give the information required by the Companies Act, 2013 ('the Act') in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards ('Ind AS') specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2026, and its profit (including other comprehensive income/ (loss)), its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013, as amended ("the Act"). Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the Standalone Financial Statements" section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have not identified any matter to be a key audit matter for the purpose of it to be communicated in our report.

Information other than the Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises Board's Report including Annexures to Board's Report but does not include the financial statements and our auditor's report thereon.
Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

Management's Responsibilities for the Standalone Financial Statements

The Board of Directors of the Company are responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that gives a true and fair view of the net profit of the financial position, financial performance and cash flows of the Company in accordance with the applicable accounting standards prescribed under Section 133 of the Act read with relevant rules issued thereunder and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of theses financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.

- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economics decisions of a reasonably knowledgeable user of the financial statement may be influenced. We consider quantitative materiality and qualitative factor in (i) planning the scope of our audit work and in evaluating the result of our work and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

Annexure B to the Independent auditor's report of even date on the financial statements of Borana Weaves Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ('the Act)

We have audited the internal financial controls over financial reporting of Borana Weaves Limited (the Company') as on March 31st, 2026 in conjunction with our audit of the financial statements of the Company for the financial year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the 'Guidance Note') issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting with reference to these financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing as specified under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting with reference to these financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting with reference to these financial statements and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, with reference to these financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting with reference in these financial statements.

Meaning of Internal Financial Controls Over Financial Reporting with reference to these Financial Statements

A company's internal financial control over financial reporting with reference to these financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting with reference to these financial statements includes those policies and procedures that

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

(2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company;
(3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting with reference to these Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting, with reference to these financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting with reference to these financial statements to future periods are subject to the risk that the internal financial control over financial reporting with reference to these financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting with reference to these financial statements and such internal financial controls over financial reporting with reference to these financial statements were operating effectively as at March 31st, 2026, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31st MARCH, 2026

1. **Corporate Information**

Borana Weaves Limited is a public limited company and incorporated under the provisions of the Companies Act, 2013. The company is engaged in twisting, Sizing & texturizing of Yarn & Weaving of Grey Cloth on Water Jet Looms. The company is converted into Limited Company w.e.f. 24th September, 2024.

The registered office of the company is located at Plot No. AA/34, B-16/16, Hojiwala Ind. Estate, SUSML, Surat, Gujarat -394230. The Corporate Identification Number (CIN) of the company is U17299GJ2020PLC117745.

The Equity shares of the Company are listed on National Stock Exchange ("NSE") & Bombay Stock Exchange ("BSE").

2. **Basis of Preparation**

The Company has applied provisions of the Companies Act, 2013 for preparation of the financial statements. The Financial Statements are prepared and presented under the historical cost convention on accrual basis of accounting, in accordance with the accounting principles generally accepted in India and comply with the mandatory Indian Accounting Standards, unless stated otherwise, (Issued by the Institute of Chartered Accountants of India). Notified under relevant provision of Company Act, 2013.

All amounts included in the financial statements are reported in lakhs of Indian rupees except share and per share data, unless otherwise stated. Due to rounding off, the numbers presented throughout the document may not add up precisely to the totals and percentages may not precisely reflect the absolute figures.

Use of Estimates

The preparation of the financial statement in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that effect the reported amounts of revenues, expenses, assets and liabilities at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future period.

SIGNIFICANT ACCOUNTING POLICIES

2.1 Revenue Recognition & Other Income

- Revenue is recognized upon transfer of control of the products to customers at a point in time i.e. when the products are delivered to the carrier in an amount that reflects the consideration that the company expects to receive in exchange for those products
- Dividend is recognized at the time of receipt.
- Interest income is accrued on a time proportion basis, by reference to the principal outstanding and effective interest rate applicable.
- Interest subsidy and Electricity duty are accounted for on the basis of receipts or where there is reasonable assurance that the Company will comply with the conditions attaching to them and that the subsidies will be received or when actually received by the Company. Subsidies from the Government are recognized in profit or loss on a systematic basis over the periods in which the Company recognizes as expenses the related costs for which the subsidies are intended to compensate.

2.2 Property, Plant, Equipment (PPE) and Intangible Assets:

- The Company has elected to continue with the carrying value of Property, Plant and Equipment ('PPE') recognized as of transition date measured as per the Previous GAAP and use that carrying value as its deemed cost of the PPE as on the transition date.

- Property, Plant, Equipment and Intangible Assets (Fixed Assets) are stated at cost, net of accumulated depreciation and impairment losses if any. The cost comprises purchase price, borrowing cost capitalization if criteria and met and directly attribute cost of bringing attributable cost of bringing the assets to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.
- Subsequent expenditure related to an item of fixed assets is added to its book value only if it increased the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing Property, Plant, Equipment and Intangible Assets, including day to day repair and maintenance expenditure and cost of replacing parts, are charged to statement of profit and loss for the period during which such expenses are incurred.
- The Company adjusts exchange difference arising on transaction of long-term foreign currency monetary items pertaining to the acquisition of a depreciable asset to the cost of the assets and depreciates the same over the remaining life of project.
- An item of property, plant and equipment is derecognized upon the disposal or when no future benefits are expected from its use or disposal. Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized net within other income / expenses in the statement of profit and loss.
- Property, Plant and Equipment (Fixed Assets) under installation or under construction as at Balance Sheet are shown as Capital Work in Progress. However, apart from the above stated assets, Wind Mill & Solar Power System also to be considered as a Capital Work in Progress in the current financial year as it is an under-installation phrase.

2.3 Depreciation

- The depreciable amount of an asset is determined after deducting its residual value. Where the residual value of an asset increases to an amount equal to or greater than the asset's carrying amount, no depreciation charge is recognized till the asset's residual value decreases below the asset's carrying amount. Depreciation of an asset begins when it is available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the intended manner. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale in accordance with IND AS 105 and the date that the asset is derecognized. The estimated useful lives of assets are as follows:

Assets	Estimated Useful life (in Years)
Factory Building	30
Furniture and Fittings	10
Office Equipment	5
Plant & Machinery	15
Computers (end user device)	6
Motor Vehicles	8
Solar System	25

Impairments of non-financial assets:

The Company assesses at each balance sheet date whether there is any indication that an asset or cash generating unit (CGU) may be impaired. Indefinite life intangibles are subject to a review for impairment annually or more frequently if events or circumstances indicate that it is necessary. If any such indication exists, the Company estimates the recoverable amount of the asset. The recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal or its value in use. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining the fair value less costs of disposal, recent market transactions are considered. An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount, Impairment losses are recognized in the statement of profit and loss.

If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

2.4 Employee Benefits

Short term employee benefits:

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. Undiscounted value of benefits such as salaries, incentives, allowances and bonus are recognized in the period in which the employee renders the related service.

Long term benefits:

Defined Contribution Plans:

The Company contributes to the employee's approved provident fund scheme. The Company's contribution paid/payable under the scheme is recognized as an expense in the statement of profit and loss during the period in which the employee renders the related services.

Defined Benefit Plans:

Gratuity Liability is a defined benefit obligation and is provided on the basis of an actuarial valuation model made at the end of the Financial Year. Contributions to such fund is charged to Profit & Loss Account. Actuarial Valuation of the Gratuity is done at the end of the Financial Year and accounted for accordingly.

2.5 Inventories

- Inventories consist of raw materials and finished goods. Raw material is valued at cost. Finished goods are valued at lower of cost and net realizable value (NRV).
- Cost of raw materials includes cost of purchases and other costs incurred in bringing the inventories to their present location and condition.
- Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be used are expected to be sold at or above cost.

2.6 Borrowing Cost

- The total borrowing cost on the acquisition of fixed assets, if pertaining to the period up to the date on which the said fixed assets have been put-to-use, has been capitalized in the respective fixed assets and the cost for the period after the said fixed assets have been put-to-use has been debited to the Profit and Loss Account.

2.7 Investments

- Investments, which are readily realizable and intended to be held for not more than one year from the date one which such investments are made, are classified as current investments. All other investments are classified as long-term investments.
- On initial recognition, all investments are measured at cost. The cost comprises the purchase price and directly attributable acquisition charges such as brokerage, fees and duties.
- Current investments are carried at the lower of cost and fair value determined on an individual investment basis. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of such long-term investments.
- On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

2.8 Cash Flows and Cash and cash equivalent

- Statement of cash flows is prepared in accordance with the indirect method prescribed in the relevant IND AS. For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, cheques and drafts on hand, deposits held with Banks, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and book overdrafts.

However, Book overdrafts are to be shown within borrowings in current liabilities in the balance sheet for the purpose of presentation.

2.9 Financial Assets:

A. Fair Value Assessment:

- Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of asset and liability if market participants would take those into consideration. Fair value for measurement and / or disclosure purposes in these Financial Statements is determined in such basis except for transactions in the scope of Ind AS - 2, 17 and 36. Normally at initial recognition, the transaction price is the best evidence of fair value.
- The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.
- A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.
- The Company uses valuation techniques those are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.
- All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

B. Subsequent Measurement:

For purposes of subsequent measurement financial assets are classified in three categories:

- Financial assets measured at amortized cost
- Financial assets at fair value through OCI
- Financial assets at fair value through profit or loss

C. Financial assets measured at amortized cost:

- Financial assets are measured at amortized cost if the financials asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. These financials assets are amortized using the effective interest rate ('EIR') method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the Statement of Profit And Loss. The losses arising from impairment are recognized in the Statement of Profit And Loss.

D. Financial assets at fair value through OCI ('FVTOCI'):

- Financial assets are measured at fair value through other comprehensive income if the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. At initial recognition, an irrevocable election is made (on an instrument-by-instrument basis) to designate investments in equity instruments other than held for trading purpose at FVTOCI. Fair value changes are recognized in the other comprehensive income ('OCI'). However, the Company recognizes interest income, impairment losses and reversals and foreign exchange gain or loss in the Statement of Profit And Loss. On de-recognition of the financial asset other than equity instruments designated as FVTOCI, cumulative gain or loss previously recognized in OCI is reclassified to the Statement of Profit and Loss.

E. Financial assets at fair value through profit or loss ('FVTPL'):

- Any financial asset that does not meet the criteria for classification as at amortized cost or as financial assets at fair value through other comprehensive income is classified as financial assets at fair value through profit or loss. Further, financial assets at fair value through profit or loss also include financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Financial assets at fair value through profit or loss are fair valued at each reporting date with all the changes recognized in the Statement of Profit And Loss.

F. De-recognition:

- The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the financial asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay.

G. Impairment of Financial Assets:

The Company assesses impairment based on expected credit loss ('ECL') model on the following:

- Financial assets that are measured at amortized cost; and
- Financial assets measured at FVTOCI
- ECL is measured through a loss allowance on a following basis:
- The 12 month expected credit losses (expected credit losses that result from those default events on the financial instruments that are possible within 12 months after the reporting date)
- Full life time expected credit losses (expected credit losses that result from all possible default events over the life of financial instruments)

2.10 Financial Liabilities:

The Company's financial liabilities include trade payable.

A. Initial recognition and measurement:

- All financial liabilities at initial recognition are classified as financial liabilities at amortized cost or financial liabilities at value through profit or loss, as appropriate. All financial liabilities classified at amortized cost are recognized initially at fair value net of directly attributable transaction costs. Any difference between the proceeds (net of transaction costs) and the fair value at initial recognition is fair recognized in the Statement of Profit And Loss.

B. Subsequent measurement:

The subsequent measurement of financial liabilities depends upon the classification as described below:-

Financial Liabilities classified as Amortized Cost:

- Financial Liabilities that are not held for trading and are not designated as at FVTPL are measured at amortized cost at the end of subsequent accounting periods. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. Interest expense that is not capitalized as part of costs of assets is included as Finance costs in the Statement of Profit And Loss.

Financial Liabilities classified as Fair value through profit And loss (FVTPL):

- Financial liabilities classified as FVTPL includes financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. Financial liabilities designated upon initial recognition at FVTPL only if the criteria in Ind AS 109 is satisfied.
- Exports benefits are accounted for in the year of exports based on the eligibility and when there is certainty of receiving the same.

A. De-recognition:

- A financial liability is de-recognized when the obligation under the liability is discharged / cancelled / expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the Statement of Profit and Loss.

B. Offsetting of financial instruments:

- Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.
- Other incomes, other than interest and dividend are recognized when the same are due to be received and right to receive such other income is established.

2.11 Foreign Currency Transactions

A. Initial Recognition

- On initial recognition, transactions in foreign currencies are recorded in the functional currency (i.e., Indian Rupee), by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

B. Measurement of foreign currency items at reporting date

- Foreign currency monetary items are translated at the closing exchange rates. Non-monetary items that are measured at historical cost in a foreign currency, are translated using the exchange rate at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency, are translated using the exchange rates at the date when the fair value is measured.

C. Recognition of exchange difference

- Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements is recognized in profit or loss in the period in which they arise.

2.12 Taxation

- Current Tax is determined as the amount of tax payable u/s 115 BAB in respect of Book Profit of the financial year.
- Deferred tax on account of timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods, is provided using the tax rates and tax laws enacted or substantially enacted by the Balance sheet date.

2.13 Provisions, Contingent Liabilities and Contingent Assets:

- Provisions are recognized when there is a present legal or constructive obligation as a result of a past event and it is probable (i.e. more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Such provisions are determined based on management estimate of the amount required to settle the obligation at the balance sheet date. When the Company expects some or all of a provision to be reimbursed, the reimbursement is recognized as a standalone asset only when the reimbursement is virtually certain.
- If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance costs.
- Present obligations arising under onerous contracts are recognized and measured as provisions. An onerous contract is considered to exist when a contract under which the unavoidable costs of meeting the obligations exceed the economic benefits expected to be received from it.
- Contingent liabilities are disclosed on the basis of judgment of management/independent experts. These are reviewed at each balance sheet date and are adjusted to reflect the current management estimate.
- Contingent Assets are not recognized, however, disclosed in financial statement when inflow of economic benefits is probable.

2.14 Leases:

- At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:
- the contract involves the use of an identified asset - this may be specified explicitly or implicitly and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified.
- the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company has the right to direct the use of the asset. The Company has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Company has the right to direct the use of the asset if either:

  # the Company has the right to operate the asset; or
  # the Company designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

Company as a lessee:

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rates as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:
- fixed payments, including in-substance fixed payments.
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date.
- Amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortized cost using the effective interest method. It is re-measured when there is change in future lease payments arising from a change in an index or rate, if there is change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is re-measured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in statement of profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

Leasehold land is amortized over the period of lease being remaining as on the date of purchase is stated as below:
1) Plot no. AA/34 of Sachin Udhyognagar Sahakari Sangh Limited: - 9 Years
2) Plot no. B 16/16 of Sachin Udhyognagar Sahakari Sangh Limited: - 9 Years
3) Plot no. AA/93 of Sachin Udhyognagar Sahakari Mandali Limited: - 10 Years

Further mentioned, Wind Mill & Solar Power system are under installation condition at the year end, which is on the leasehold land, the details for such properties will be shown in the year in which the same is put to use.

Short-term leases and leases of low-value assets:

The Company has elected not to recognize right-of-use assets and lease liability for the short-term leases that have lease term of 12 months of less and leases of low-value assets. The Company recognizes the lease payments associated with such leases as an expense on a straight-line basis over the lease term.

2.15 Income Taxes:

Income tax expense represents the sum of tax currently payable and deferred tax. Tax is recognized in the Statement of Profit and Loss, except to the extent that it relates to items recognized directly in equity or in other comprehensive income.

Current Tax:

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities.

The tax rates and the a tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the country where the Company operates and generates taxable income. Current tax assets and liabilities are offset only if there is a legally enforceable right to set it off the recognized amounts and it is intended to realize the asset and settle the liability on a net basis or simultaneously.

Deferred Tax:

Deferred tax is provided using the balance sheet method on temporary differences between the tax base of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss,
- Taxable temporary differences arising on the initial recognition of goodwill.
- Temporary differences related to investments in subsidiaries, associates, and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses (including unabsorbed depreciation) can be utilized, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.

2.16 Current versus Non-Current classification:

The Company presents assets and liabilities in the Balance Sheet based on current/non-current classification.

a) An asset is current when it is:
- Expected to be realized or intended to be sold or consumed in the normal operating cycle,
- Held primarily for the purpose of trading,
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

b) A liability is current when:
- It is expected to be settled in the normal operating cycle,
- It is held primarily for the purpose of trading,
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

c) Deferred tax assets and liabilities are classified as non-current assets and liabilities.

d) The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents.

2.17 Government Grants and Subsidies

Government grants are initially measured at amount receivable from the Government and are recognized on an accrual basis only if there is reasonable assurance that they will be received and the company will comply with the conditions associated with the grant and for those grants which are uncertain are not recognized unless there is reasonable assurance of the same.

- In case of capital grants, they are deducted from the cost of the Fixed Assets against which the same is received & accordingly depreciation is charged on the reduced value of the asset.
- In case of grants that compensate the Company for expenses incurred are recognized in Statement of Profit and Loss by decreasing the Expense e.g. Power subsidy to be reduced from Factory Power Expenses.

2.18 Earnings per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by weighted average number of equity shares outstanding during the financial year, adjusted for bonus elements and stock split in equity shares issued during the year and excluding treasury shares. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares and stock split, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.

Diluted EPS adjust the figures used in the determination of basic EPS to consider.
- The after-income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- The weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

2.19 Expenses related to Initial Public Offering (IPO)

IPO expenses are generally accounted for as a deduction from equity (security premium) to the extent they are incremental costs directly attributable to the equity transaction. These expenses include costs like legal, accounting, and regulatory fees, printing costs, and stamp duties. However, if the IPO is not probable or no longer probable, the expenses are charged to the profit and loss account. When an IPO is considered probable, expenses are parked in an advance account. When shares are issued, the advance amount is debited to equity related to listing expenses whereas Roadshow expenses, which are generally considered promotional activities, are typically not directly related to the equity issue.

In essence, the IND AS treatment of IPO expenses focuses on ensuring that costs directly attributable to the equity issuance are properly recognized as deductions from equity, while other costs are expensed as incurred.
Accordingly, the Initial Public Offer (IPO) proceeding expenses which are directly attributable to the offerings are written off from security premium account where the company has received the premium amount from public offerings.

Sensitivity Analysis Gratuity Plan

Sensitivity Analysis: Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate and expected salary increase rate. Effect of change in mortality rate is negligible. Please note that the sensitivity analysis presented below may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumption would occur in isolation of one another as some of the assumptions may be correlated. The results of sensitivity analysis are given below:

Note 37:

FINANCIAL INSTRUMENTS:

A. Accounting classification and fair value measurement:

The fair value of financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

The carrying amount of trade receivable, trade payable, loans, cash and cash equivalents, other bank balances and other receivables as at 31st March, 2026 and 31st March, 2025 are considered to be the same as their fair values, due to their short-term nature. Financial Instruments with fixed and variable interest rates are evaluated by the Company based on parameters such as interest rate and individual credit worthiness of the counterparty. Based on this evaluation, allowances are taken to account for the expected losses of these receivables.

Fair value hierarchy

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of following:

Level 1 - Category includes financial assets and liabilities, that are measured in whole or in significant part by reference to published quoted price (unadjusted) in an active market.

Level 2 - Category includes financial assets and liabilities measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions. These include assets and liabilities for which pricing is obtained via pricing services, but where prices have not been determined in an active market, financial assets with fair values based on broker quotes and assets that are valued using the Company's own valuation models whereby the material assumptions are market observable. The majority of Company's over-the-counter derivatives and several other instruments not traded in active markets fall within this category.

Level 3 - Category includes financial assets and liabilities measured using valuation techniques based on non market observable inputs. This means that fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. However, the fair value measurement objective remains the same, that is, to estimate an exit price from the perspective of the Company. The main asset classes in this category are unlisted equity investments as well as unlisted funds.

B. Financial risk management objectives and policies:

The Company's activities expose it to a variety of financial risks: market risk, credit risk and liquidity risk. The Company's primary focus is to foresee the unpredictability of financial markets and seek to minimise potential adverse effects on its financial performance.

The Company’s financial liabilities comprise of trade payable and other liabilities to manage its operation and financial assets include trade receivables, security deposits, loans and advances, etc, arises from its operation.

The Company's board of directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company has implemented a robust Business Risk Management framework to identify, evaluate business risks and opportunities. This framework seeks to create transparency, minimise adverse impact on the business objectives and enhance the Company’s competitive advantage. The business risk framework defines the risk management approach across the enterprise at various levels including documentation and reporting. The framework has different risk models which help in identifying risks trend, exposure and potential impact analysis at a Company level.

The Audit Committee of the Board periodically reviews the risk management framework.

1) MARKET RISK:

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from adverse changes in market rates and prices. The Company’s size and operations result in it being exposed to the following market risks that arise from its use of financial instruments:

a) currency risk;
b) other price risk; and
c) interest rate risk

The above risks may affect the Company’s income and expenses, or the value of its financial instruments. The Company’s exposure to and management of these risks are explained below.

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company's exposure to the risk of changes in foreign exchange rates relates primarily to the Company's operating activities (where revenue, expense or capital expenditure is denominated in foreign currency). Foreign currency exchange rate exposure is partly balanced by purchasing of goods from the respective countries. The Company evalutes exchange rate exposure arising from foreign currency transactions and follows established risk management policies.

The Company's exposure to foreign currency risk at the end of the reporting period expressed in INR for major currency, are as follows:

Particulars	As on 31-03-2026	
	USD Dealings	Total
Financial Assets		
Trade Receivable (Net)	-	-
	-	-
Financial Liabilities		
Commission Payable	-	-
	-	-

Particulars	As on 31-03-2025	
	USD Dealings	Total
Financial Assets		
Trade Receivable (Net)	-	-
	-	-
Financial Liabilities		
Commission Payable	-	-
	-	-

Sensitivity Analysis:-

A 5% change in the exchange rate of INR against key foreign currencies would result in the following impact on the Group's profit before tax:

Increase/ (Decrease) Company's Profit and Equity

	As on 31-03-2026	As on 31-03-2025
5% weakening of Indian Rupee	0.00	0.00
5% Strengthening of Indian Rupee	0.00	0.00

Note: The Company is not materially exposed to market risk, as it has no significant exposure to fluctuations in interest rates, foreign exchange rates, commodity prices, or other market variables.

2) CREDIT RISK:

Credit risk is the risk that a counterparty fails to discharge its obligation to the Company. The Company's exposure to credit risk is influenced mainly by cash and cash equivalents, trade receivables and financial assets measured at amortised cost. The Company continuously monitors defaults of customers and other counterparties and incorporates this information into its credit risk controls.

a) Credit risk management:

i) Credit risk rating:

The Company assesses and manages credit risk of financial assets based on following categories arrived on the basis of assumptions, inputs and factors specific to the class of financial assets.

A: Low credit risk

B: Moderate credit risk

C: High credit risk

The Company provides for expected credit loss based on the following:

Asset group	Provision for expected credit loss
Low credit risk	12 month expected credit loss
Moderate credit risk	Life time expected credit loss
High credit risk	Life time expected credit loss or fully provided for

Cash and cash equivalents carry no credit risk and hence are not classified under either of the asset groups.

Based on business environment in which the Company operates, a default on a financial asset is considered when the counter party fails to make payments within the agreed time period as per contract. Loss rates reflecting defaults are based on actual credit loss experience and considering differences between current and historical economic conditions.

Assets are written off when there is no reasonable expectation of recovery, such as a debtor declaring bankruptcy or a litigation decided against the Company. The Company continues to engage with parties whose balances are written off and attempts to enforce repayment. Recoveries made are recognised in statement of profit and loss.

Summary of expected credit loss provided by the management is as follows:

FINANCIAL ASSET	ASSET GROUP	As on 31-03-2026	As on 31-03-2025
Investments	Low credit risk	-	-
Trade Receivables	Low credit risk	-	-
Loans	Low credit risk	-	-

ii) Concentration of trade receivables

The Company's exposure to credit risk for trade receivables is as follows - **(Rs. in Lakhs except as stated)**

Particulars	As on 31-03-2026	As on 31-03-2025
Related Party	62.15	232.97
Others	2,302.04	3,689.75
Total	**2,364.19**	**3,922.71**

b) Credit loss assessment for trade receivables:

Customer credit risk is managed by the management subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit review and individual credit limits are defined in accordance with this assessment. Outstanding customer receivables are regularly monitored. At the year end the Company does not have any significant concentrations of bad debt risk. An impairment analysis is performed at each reporting date on an individual basis for major clients. The calculation is based on historical data. The Company does not hold collateral as security. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and operate in largely independent markets.

3) LIQUIDITY RISK:

Liquidity risk is the risk that the Company will face in meeting its obligations associated with its financial liabilities. The Company's approach in managing liquidity is to ensure that it will have sufficient funds to meet its liabilities when due without incurring unacceptable losses. In doing this, management considers both normal and stressed conditions. The Company maintained a cautious liquidity strategy, with a positive cash balance throughout the year ended 31st March, 2026 and 31st March, 2025. Cash flow from operating activities provides the funds to service the financial liabilities on a day-to-day basis. The Company regularly monitors the rolling forecasts to ensure it has sufficient cash on an on-going basis to meet operational needs. Any short-term surplus cash generated, over and above the amount required for working capital management and other operational requirements, is retained as cash and cash equivalents (to the extent required) and any excess is invested in interest bearing term deposits and other highly marketable investments with appropriate maturities to optimise the cash returns on investments while ensuring sufficient liquidity to meet its liabilities.

Note 38:

CAPITAL MANAGEMENT:

A. Risk management

Capital includes equity attributable to the equity holders to ensure that it maintains an efficient capital structure and healthy capital ratios in order to support its business and maximise shareholder value. The Company manages its capital structure and makes adjustments to it, in light of changes in economic conditions or its business requirements. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. No changes were made in the objectives, policies or processes during the year ended March 31, 2026 and March 31,2025.

The Company monitors capital using a gearing ratio, which is net debt divided by total equity.

Net debt = Total borrowings (including lease liabilities) less (Cash and cash equivalents + Bank balance other than cash and cash equivalents (excluding balance earmarked for unclaimed dividend and other liabilities) + Current investments).

Total 'equity' as shown in the balance sheet, including non controlling interest.

(Rs. in Lakhs except as stated)

Particulars	As on 31-03-2026	As on 31-03-2025
Total Debt	6,950.46	5,904.59
Less: Cash and cash equivalent including mutual fund and bank deposit with original maturity between 3 to 12 months	168.45	4.02
Net Debt (A)	**6,782.01**	**5,900.58**
Total Equity (B)	28,157.50	8,754.95
Net Debt to Equity Ratio (A/B)	**0.24**	**0.67**

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowings in the current period.
